**FINAL PAVING ON U.S. ROUTE 4 PROJECT IN NORTHWOOD**  
**INCLUDES INTERSECTION OF U.S. ROUTE 4 AND BOW LAKE ROAD**

The New Hampshire Department of Transportation announces final paving work is scheduled to begin the week of June 10, 2002 in Northwood on a half-mile section of U.S. Route 4 and its intersection with Bow Lake Road.

This paving work is expected to take up to three weeks to complete. Daily occasional lane closures and alternating traffic can be expected. Uniformed officers will be used to control traffic. Motorists driving on U.S. Route 4 in the Northwood area should expect minor delays until the paving work is completed.

This project has included road grade improvements, the addition of left turn lanes on Route 4, the construction of a sidewalk along the north side of Route 4, and the widening of Bow Lake Road at the approach to Route 4 to create separate left and right turn lanes.

Weaver Brothers Inc. of Bow, New Hampshire is the prime contractor for the \$1.2 million project.
